OIST SEMINAR

Recent Advances in Superstring Theory

Speaker

Prof. Hiroshi Ooguri

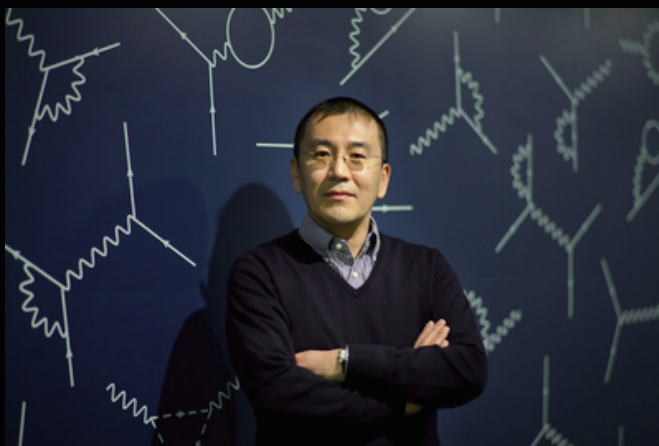

Wed.

July 2nd,

13:30-

B250 Seminar Room

Superstring theory is a leading candidate for the ultimate unified theory of all the forces and matter in nature including gravity. In this talk, I will review basic ideas of this theory and recent advances including new understanding of spacetime geometry at the unification scale. The talk is aimed at general science audience.

Prof. Hiroshi Ooguri

Fred Kavli Professor of Theoretical Physics and Mathematics
Director of the Walter Burke Institute for Theoretical Physics
Deputy Chair of the Division of Physics, Mathematics, and Astronomy
California Institute of Technology

Principal Investigator
Kavli Institute for the Physics and Mathematics of the Universe
University of Tokyo
