

Innovation Seminar Series

sponsored by the Office for the Sustainable Development of Okinawa

IP Creation and Management in Academic Research

Trained as a Physicist at Oxford University, Gwilym is qualified as a European Patent Attorney, and holds the position of Honorary Visiting Professor of Queen Mary University of London.

Gwilym's talk will:

- explain how to determine if an invention can be patented?
- compare and contrast the scientist/inventor and paper/patent
- discuss what makes a strong patent
- share some of his experiences of helping inventors
- an extended Q&A session
