

Spatial analysis from a single cell

Monday, July 10, 2023
14:00 - 15:00

*No prior application required to attend this seminar.

Room:
Center Building C210

*There will be an engineer from 10X to answer your question after presentation. Why don't you attend the presentation and utilize the experiment to your research.

The vast complexities of biology require approaches to build a complete picture, starting from single cells to tissues and beyond.

At 10x Genomics, we provide single cell, spatial, and in situ technologies that fuel scientific discoveries and drive exponential progress.

Unravel highly complex biological systems, while bringing into focus the details that matter most. Join us to learn how Chromium Single Cell and Xenium In Situ platforms from 10x Genomics can help you push the boundaries of your research. Uncover molecular insights, dissect cell-type differences, investigate the adaptive immune system, detect novel subtypes and biomarkers. Enabling deeper insight into cancer, immunology, neuroscience, and developmental biology, 10x Genomics gives researchers the ability to see biology in new ways.
