

The **Provost**
Lecture Series 10

B250

To celebrate him for being elected as MRS Fellow, AVS Fellow and his Kao Science Award

Surface sciences and perovskite solar cells

Professor, Energy Materials and Surface Sciences Unit

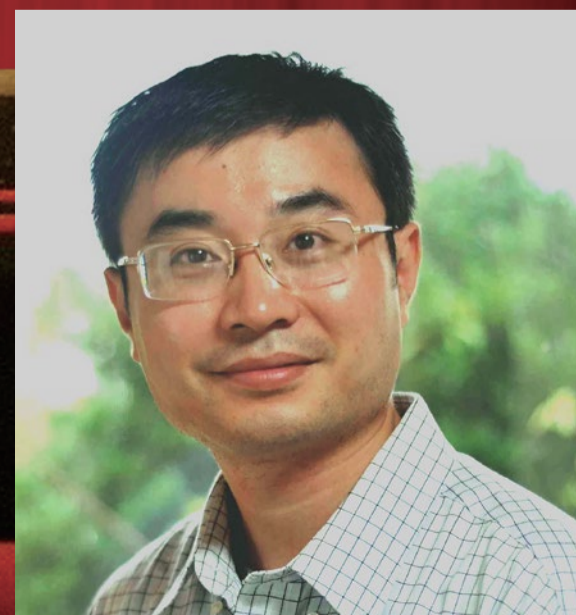

Yabing Qi

Chair: Professor Evan Economo,
Biodiversity and Biocomplexity Unit, Dean of Faculty Affairs

Thu. December 14, 2023

16:00–17:45 Sydney Brenner Lecture Theater B250

Office of the Provost ✉ provost_office@oist.jp

The Provost Lecture Series will provide an opportunity to celebrate milestones in the careers of OIST faculty members. It will recognize newly promoted professors and those who have received prestigious awards. It will highlight faculty achievements and create a space for retiring professors to talk about their research accomplishments and lessons learned over the course of their career. It is a way to celebrate OIST faculty, introduce them to the broader OIST community, acknowledge their research successes, share about their teaching and mentorship of students, and honor their service to the university.
