

Biosafety Seminar 2023

Generation of Disease Model Mice by Genome and Epigenome Editing

- 16:00-17:00 November 16 2023
- Sydney Brenner Lecture Theater (B250)
- Dr. Izuho Hatada

Professor of Genome Science
Institute for Molecular and Cellular Regulation
Gunma University

The epigenome is known to be associated with cancer and lifestyle-related diseases, etc.
In this seminar, Dr Hatada will discuss epigenomic disease research using genome and epigenome editing technologies and safety measures for conducting such research.
