PRECISION THAT INSPIRES

SEMINAR

FOR TISSUE CYTOMETRY

Friday, August 2
11:00-12:00 AM

Speaker: Felix Tsai
APAC Business Manager
TissueGnostics

Lecture Room:
Lab1 C015

ABSTRACT

Discover the TissueFAXS™ Cytometer's capabilities in analyzing molecular markers in situ across any cell type within tissue, without cell solubilization. Applications include:

- High-resolution whole slide confocal imaging from standard to extra-large slides.
- Exploring spatial information in brain, tumor, and other tissues.
- Detection and quantification of fluorescence and chromogenic markers.
- AI tissue classification of various tissue structures.
- Multiplexing and multispectral sample analysis.

Join us to learn more about these advanced applications and how they can benefit your research.
