

ZEISS on Your Campus – Technology Seminar

A New Age in Life Science Imaging with 3D Electron and X-ray Microscopy

To gain a multimodal understanding of cellular ultrastructure and function, 3D electron microscopy (volume EM) imaging technology is attracting considerable attention and was selected as one of the seven technologies to watch in 2023 by Nature.

In this seminar, we will introduce the latest topics, including volume EM, correlative microscopy with X-ray and light microscopy, and AI-powered image analysis.

Speaker

Dr. Alexandra F. Elli
Manager Business Sector Life Sciences
BioEM/XRM
ZEISS Research Microscopy Solutions

Event Details

Date: 29th July, 2025 (Tue)

Time: 2 p.m. ~

Location: B503, Center Building
