

Research & Career Seminar with AIST

Career Development Project : Step 1

August 26, 2025 | 15:00–17:00
Lab 3, Seminar Room C700

Explore Research & Career Paths in Japan!

As part of the collaboration between OIST and the National Institute of Advanced Industrial Science and Technology (AIST), the two institutions have launched a Career Development Project to support students and researchers in exploring career opportunities in Japan.

About AIST and G-QuAT

AIST is one of Japan's largest public research organizations, dedicated to developing and applying technologies that benefit industry and society.

G-QuAT, AIST's Global Research and Development Center for Business by Quantum-AI Technology, aims to advance quantum technology, foster global markets through practical applications, and create economic value through collaboration with industry.

Program

Session 1: Research Presentations

Researchers from AIST will introduce their cutting-edge work in the quantum field.

- Overview of G-QuAT
- Introduction of G-QuAT services

Session 2: Career Q&A Session

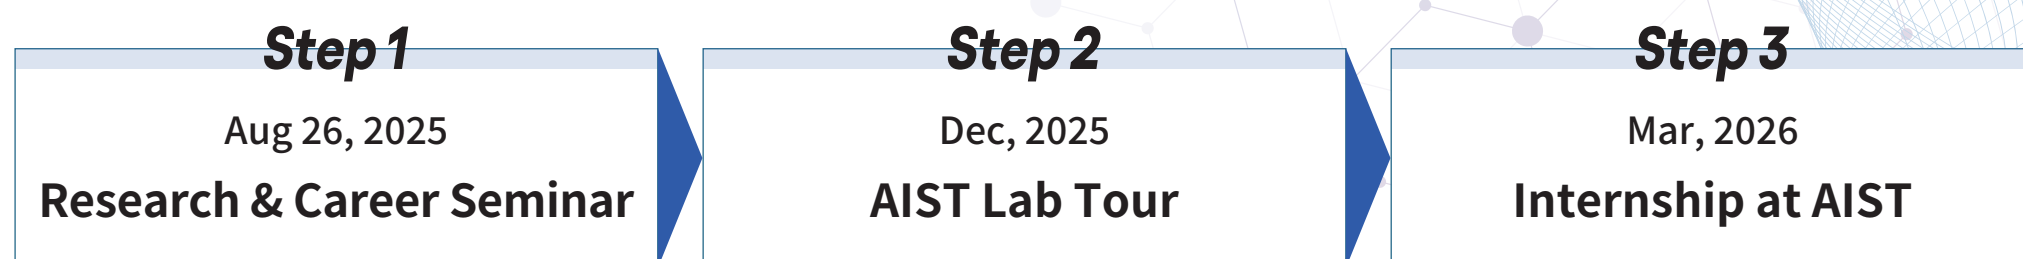

Participants will break into small groups and have the opportunity to ask AIST researchers about:

- Careers at AIST
- Research life in Japan
- Job-hunting strategies for scientists in Japan

Who Should Join?

- OIST PhD Students and Postdocs
- Note 1: Participants from all research fields are welcome
- Note 2: Attending only Session 1 is also perfectly fine

Career Development Project Roadmap

Hosted by: OIST & AIST
