

The **Provost**
Lecture Series 23

In celebration of her promotion to Full Professor

B250

**Chemistry enabled
by mechanical force:
from glowing materials to
force-activated reactions**

Professor, Coordination Chemistry and Catalysis Unit

Julia Khusnutdinova

Chair: Marco Terenzio, Associate Professor, Molecular Neuroscience Unit

Fri., April 17, 2026

14:00–15:30 Sydney Brenner
Lecture Theater **B250**

Office of the Provost ✉ provost_office@oist.jp

The Provost Lecture Series will provide an opportunity to celebrate milestones in the careers of OIST faculty members. It will recognize newly promoted professors and those who have received prestigious awards. It will highlight faculty achievements and create a space for retiring professors to talk about their research accomplishments and lessons learned over the course of their career. It is a way to celebrate OIST faculty, introduce them to the broader OIST community, acknowledge their research successes, share about their teaching and mentorship of students, and honor their service to the university.
