

OIST Open Biosafety Seminar 2026

Co-hosted by BMSA

Navigating the Frontiers of Synthetic Biology

Speakers:

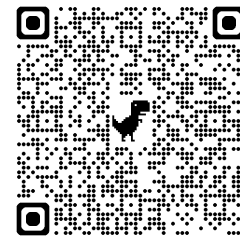

Prof. Daisuke Kiga (Waseda University)

Prof. Norikazu Ichihashi (The University of Tokyo)

Date and Time: October 8 (THU), 2026, 15:00-16:30

Venue: Sydney Brenner Lecture Theater (B250)

Language: English and Japanese

Register here!

Join us for an insightful seminar featuring two pioneering experts in synthetic biology.

They will present their latest research on the Darwinian evolution of RNA-protein self-replication systems, synthetic gene circuits, and mirror-image biology. Furthermore, the session will explore the transformative role of AI technology in biological research and facilitate a critical discussion on the ethical considerations and risks associated with these cutting-edge technologies.
