1 Scales

For many branches of science it is important to understand the physics of really small scales. One important length scale is 1 Å (ÅNGSTRÖM), which corresponds to 0.1 nm. In order to use μ you can use the *textcomp* package and the `\textmu` command.

1.1 Length Scales

1 km
1 m
1 dm
1 cm
1 mm
1 μ m
1 nm
1 Å
1 pm
1 fm
