Professor, Femtosecond Spectroscopy Unit

Keshav Dani

Chair: Professor Nic Shannon, Theory of Quantum Matter Unit

Fri., Dec. 6, 2024

14:00–15:30 Sydney Brenner Lecture Theater B250

Office of the Provost ✉ provost_office@oist.jp

The Provost Lecture Series will provide an opportunity to celebrate milestones in the careers of OIST faculty members. It will recognize newly promoted professors and those who have received prestigious awards. It will highlight faculty achievements and create a space for retiring professors to talk about their research accomplishments and lessons learned over the course of their career. It is a way to celebrate OIST faculty, introduce them to the broader OIST community, acknowledge their research successes, share about their teaching and mentorship of students, and honor their service to the university.
