

How to use the Displays in B503

- 1 Tap the touch screen to wake up the system.
- 2 Connect your PC to the HDMI cable at Podium or desk locations.

i From the Home screen, tap **Room Control**, and navigate to the **Main Displays** section.

Tap **Left/Right Display Power** toggles to turn on the displays. Confirm **Cisco VC** is the selected source for both displays.

ii Navigate to **Presentation Sources** section. Tap **Automatic Switching** to automatically set video source. Alternatively, use the **Manual Source Selector** to select the video source.

Note: Regular laser pointers do not work on LCD monitors. Use a mouse pointer or digital pointer instead. Contact AV Services for a digital pointer recommendation.

Troubleshooting

- **No Image on screen?**
Unplug and reconnect the video cable to your laptop, ensuring it is firmly connected.
Confirm settings in steps (i) and (ii) above.

Contact AV Services at av@oist.jp or 21534, to request assistance or report a fault.
