The First International Symposium on Open Energy Systems

Tuesday,
14th January

to
Wednesday,
15th January, 2014

Venue:

B250 Seminar Room, Lev.B, OIST Campus

Energy supply and demand control is one of the most urgent and critical issues in the current global energy agenda today. Shift to renewable energy sources is claimed to have high priority, yet numbers of technical, economical, and social issues remain.

The symposium is framed around "Open Energy Systems" and its applications to various social and geographical situations such as industrialized cities, isolated islands and remote areas with unstable electricity.
