# Quick guide < Keyword search >

NII 論文情報ナビゲータ (CiNii)

CiNii is a service that provides information on scholastic articles, with an emphasis on Japanese papers. It allows users to find articles they desire by navigating a large volume of information including periodicals published by Japanese scholastic societies, research bulletins published by Japanese universities, and the National Diet Library periodicals index database.

Features
- Desired articles can be easily found from among a large volume of article information.
- Periodicals published by scholastic societies as well as research bulletins issued by universities, etc. are available for inspection.
- Through joint collaborations, we also provide links to navigate to full text documents, etc. on other services.

CiNii top page

Simple search

CiNii
NII Scholarly and Academic Information Navigator
Number of records:22566549(2009/01/21)

FreeWord   **A-1**   Search
▶ Advanced   ⊙ All ○ Include Full-text ○ Include Full-text and/or link
CiNii Journal with full text Directory   **P.3**

Searches can be performed easily by inputting keywords. Searches can be targeted to registered article information like article name, author name, author affiliation, publication name, ISSN, volume, issue, page, publisher, abstract and article keyword.

A-1 Searches can be refined.
"All. " all articles are searched.
"CiNii full text documents"
 searches for full text documents from scholastic society journals and research bulletins hosted by CiNii.
"CiNii full text document / CiNii partner link"
 searches for full text documents hosted by CiNii as well as those with links on partner services (such as Ichushi Web, etc.)

Advanced search

CiNii
NII Scholarly and Academic Information Navigator
Number of records:22566549(2009/01/21)

B-1
FreeWord II

Publisher   References   Year From   To
⊙ All ○ Include Full-text ○ Include Full-text and/or link
Search
CiNii Journal with full text Directory   **P.3**

Clicking " Advanced" displays the advanced search input field.
With advanced search, desired searched categories can be specified.

B-1 There are input fields for article name, author name, author affiliation, publication name, ISSN, volume, issue, page, publisher, works cited, and year of publication. Additionally, multiple search condition relationships (logic operators) can be used.

Search technique
- No distinction is made between numbers, capital or lower case letters or Japanese full-width or English half-width characters.
- Searches using OR nor NOT between categories cannot be performed.

Hint ! Concepts of CiNii The three elements
< Article >   <Author>   <Publication>

Search using "AND"
Search for records containing all entered keywords. Specify using spaces (English half-width spaces and Japanese full-width spaces) or "_&_" (where _ is a space, as in the example below).
Example: Inputting "information digital" or "information & digital" returns search results for records containing both "information" and "digital"

Search using "OR"
Search for records containing any of the entered keywords. Specify using "_OR_" **(OR is written in English half-width characters・upper case letters)** or "_|_" (where _ is a space, as in the example below)
Example: Inputting "information OR digital" or "information | digital" returns search results for records containing either "information" or "digital" or both.

Search using "NOT"
Search for records containing the entered keyword(s) but excluding the keyword after NOT. Specify using "_NOT_" **(NOT is written in English half-width characters・upper case letters)** or add "_-" (where _ is a space and is an English half-width hyphen) after the main keyword(s) but before the term to be excluded.
Example: Inputting "information NOT digital" or "information -digital" returns search results for records containing "information", excluding those records that contain "digital".

Article search results list

C-1 When a keyword is added, it is possible to further refine the search.

C-2 You can choose to output the search results in "display details all together" or "Refer/BiblX format".

C-3 The number of articles displayed per page can be specified at "20/50/100/200 hits". Additionally, the sorting order can be set for new order, old order, article name (ascending/descending), publication name (ascending/descending), works cited (descending).

C-4 Clicking the article name takes you to the details page.

C-5 Author name, snippet (only for articles with abstracts), publication name, volume, issue, and works cited (number) are displayed. CiNii PDF or CiNii Link1 is displayed when the article is hosted by CiNii whereas the name (example 医中誌) is displayed when there is a link to a partner service. Additionally, hit keywords are highlighted.

C-6 Author and publication name are listed in the search results. After clicking, the advanced search categories for author and publication name are searched for again.

Details Display Page

D-1 Author name and affiliation are displayed.

D-2 CiNii PDF or CiNii Link displayed when the article is hosted by CiNii. Also, the icon of the partner service (example 医中誌) is displayed.

D-3 The full text of the abstract is displayed when available.

D-4 Publication name, publisher, volume, and page are displayed.

D-5 Works cited are displayed in a list.

D-6 Citing works are displayed in a list.

D-7 A preview of the first page of an article is displayed when the full text document is available.

D-8 Keywords assigned to the article are displayed.

D-9 The article s various codes are displayed.

D-10 Bibliography information for the article is written in "Refer/BiblX", "BibTex", and "Tab Separated Values (TSV)" formats.

SPARC/JAPANにみる学術情報の発信と大学図書館(<特集>学術情報流通としての出版)
2003年10月1日 9:00

我が国の学術論文の多くは欧米の雑誌に掲載され,海外に流出している。一方,国内の大学図書館が購入する外国雑誌のタイトル数は、急激に減少している。欧米ではSPARCという大学図書館活動が組織され,日本でも、電子ジャーナルのコンソーシアム契約など学術コミュニケーションに対する変革が始まっている。しかし,日本の学協会等の学術雑誌は、いまだ国際化や電子ジャーナル化への対応が不十分であり,電子流通に対するビジネスモデルが未発達である。こうした問題点を解決するため国立情報学研究所は,科学技術振興事業団や国内外の大学図書館と連携して,国際学術情報流通基盤整備事業(SPARC/JAPAN)を開始した。

Works with OpenSearch
F-1 It is possible to perform the same search by making an OpenSearch query as it is by using the search page on the CiNii website.
F-2 Entering a keyword into the search bar displays the search results page.

F-4

The contents of the details page can be output with RDF. With RDF, CiNii s data can be utilized in various ways since each data item, like article name or author name, is structured in a standardized way using metadata descriptors such as Dublin Core, etc. and is output with XML.
F-3 "/rdf" is added to the URL (PermaLink) of the article s details page.
http://ci.nii.ac.jp/naid/***********/rdf
F-4 The contents of the details page are output with RDF.

The big picture / Inquiries
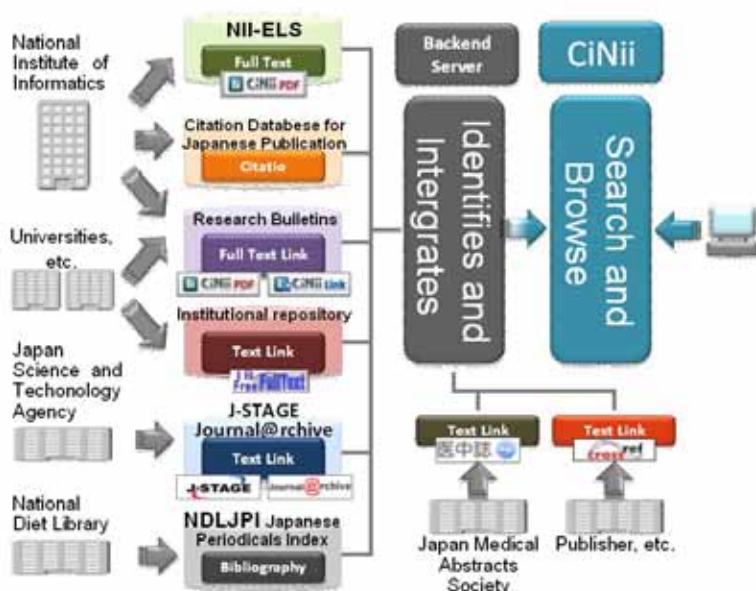

CiNii identifies and integrates large volumes of various data, cooperates with outside organizations, etc., and provides services. We hope to continue to improve our service so that our users can comfortably navigate our site and locate the resources they hope to find.
